Professional Summary

Senior Backend Software Engineer with years of experience designing, building, and scaling secure, high-performance backend systems, RESTful APIs, SaaS platforms, and cloud-native applications. Expertise spans PHP (Laravel), Node.js (NestJS), React.js, TypeScript, AWS, Docker, Terraform, microservices, Domain-Driven Design (DDD), CQRS, and CI/CD. Proven success delivering fintech, payment, and enterprise solutions, improving performance, strengthening security, and leading architectural decisions across cross-functional teams.

Core Competencies

• Backend Engineering • System Design • Microservices • REST & GraphQL APIs • Cloud & DevOps • Payment Systems • Event-Driven Architecture • Performance Optimization • CI/CD • Technical Leadership

Technical Skills

Languages: PHP, Node.js, JavaScript, TypeScript, Python, Golang

Frameworks: Laravel, NestJS, React.js, Symfony

Databases: MySQL, PostgreSQL, Redis, NoSQL

Cloud/DevOps: AWS, Docker, Terraform, Linux, Bash, DigitalOcean, CI/CD, Capistrano

Architecture: DDD, CQRS, SOLID, Service Layer, Event-Driven Architecture, Microservices

Version Control: Git, GitHub

Professional Experience

CODARC SYSTEMS INC – Principal Backend Engineer/Architect (Feb 2023 – Present)

- Designed scalable payment infrastructure with Laravel, queues, and asynchronous job processing, reducing payment failures by 25%.
- Built dynamic multi-country payment routing using Stripe and Mollie.
- Improved application performance by 60% through database optimization and RoadRunner.
- Implemented WebSocket-based real-time wallet updates using Soketi.
- Enhanced platform security through fraud detection and DDoS mitigation.

MTN – Senior Backend Engineer (Jan 2021 – Feb 2023)

- Designed and developed REST APIs, AI automation services, and digital wallet solutions.
- Integrated OpenAI, Google Gemini, and KUDA Banking APIs.
- Improved CI/CD pipelines, backend latency, and Redis event processing.
- Led architecture reviews, code reviews, and testing initiatives.

Migher World Technologies – Full Stack Developer (Mar 2018 – Nov 2020)

- Built a page builder using Laravel and JavaScript.
- Developed 200+ landing pages and integrated 20+ CRM platforms.
- Integrated Stripe and Paystack payment systems supporting 20,000+ users.

Education

B.Sc. Computer Science and Information Technology
University of Benin (2016)
